

Picture Framing Cutters

I am a picture framer and need a professional cutting machine for my workshop

I want a heavy-duty matcutter that copes easily with all day cutting of both thick conservation board and standard matboard

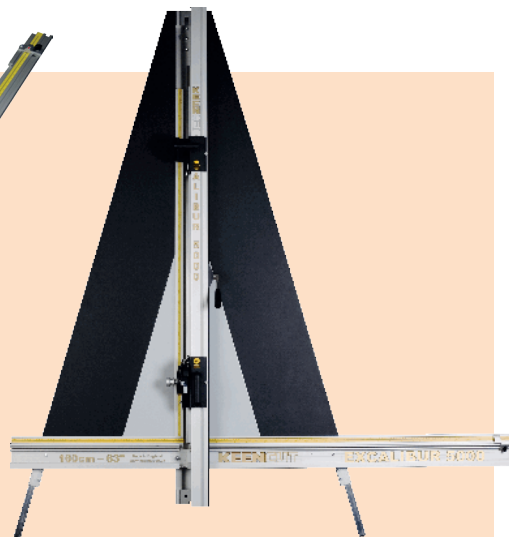

Ultimat Futura

Versatile and technically advanced professional mountcutter

- Ball bearing rollers deliver a sliding action that is smooth, precise and ultra low friction
- Unique micro-stops for precision adjustment
- Fatigue reducing roller lift & hold
- 3 sizes: 1m, 1.2m & 1.5m

I need the perfect solution for cutting my matboard blanks, backing board, Plexiglas and glass

Excalibur 5000

Advanced vertical cutter for the professional picture framer

- Twist & lock rotating turret
- Integral counterbalance
- Full-length clamping
- Telescopic legs
- Easy-to-use production stops
- 2 sizes: 122cm & 163cm

 See reverse for Precision Bench Top Cutters

Specialist Cutters

I would like to cut flexographic plate precisely

Futura Flexo

Ideal for both general purpose and flexo plate cutting

- Bevel and vertical cutting on one head
- Ergonomically designed cutting head
- Magnetic blade holders
- Unique roller lift and hold
- 4 sizes: 100cm, 120cm, 150cm & 218cm

I cut and seal textiles with a hot knife and need a machine to ensure straight, accurate cuts

Sabre HotCut

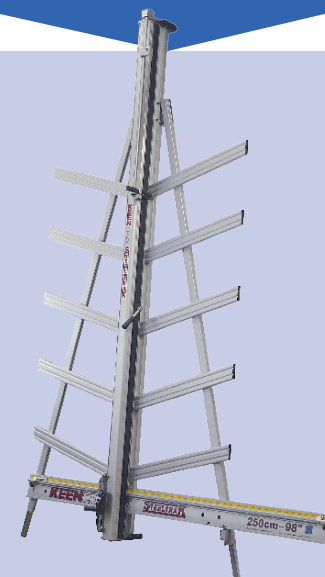

A safe and accurate way to use a hot knife cutter

- Choice of spring loaded holder for either the HSGM or AZ hot knife
- Securely holds the hot knife for accurate and safe 90° cutting
- Use on bench or mount to an optional stand
- 3 sizes: 90cm, 190cm & 290cm

*Use with a compatible hot knife holder – sold separately

Heavy Duty Board Cutter

I need a heavy-duty board cutter for producing a clean finished edge on aluminium composite panel, PVC foamboard, fluted plastics, corrugated card and other rigid materials

SteelTraK

Robust, reliable and easy to use

- Turn and lock ready mounted tools
- Perma-lock squaring for accurate cutting every time
- Same cut line for all tools
- Low friction ball bearings on a steel track
- Telescopic legs for user customisation
- Full-length, extra-grip clamping system
- 20 year replacement guarantee on all sliding bearings
- 3 sizes: 165cm, 210cm & 250cm

STEELTRAK

Precision Bench Top Cutters

I want to cut a range of rigid and flexible materials including PVC foamboard, fluted plastics, card, banner, paper, films and textiles

I need to cut pop-up banners, wallpapers and/or other cut joined panels. Ultra High Precision is essential

I would like a future proof solution and maximum flexibility for use in a production facility

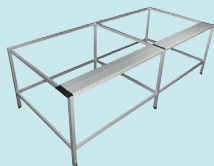

Evolution E2

Integrated wide format cutting system designed to revolutionise the speed, accuracy and convenience of the finishing process

- Vertical cutting action & interchangeable tools
- Leave worktop clear with cutter hinge-down feature
- Integrated lifters
- Fit to any bench
- 5 sizes: 1.6m, 2.1m, 2.6m, 3.1m & 3.6m

The E2 Bench, plus cutter, provides the complete professional solution

Evolution E2 Bench

Accessory for the Evolution E2

- Integrated aluminium base for quick and easy mounting of the Evolution E2
- High grade, precision alloy construction for supreme strength & lasting resistance to abrasions & damage
- Unique joint lock gives double safety under heavy load and an ultra rigid structure
- Extension kits available

I am not so concerned with high levels of flexibility or production, I just want perfect results

I already have a flat, stable bench to mount the cutter on

Javelin Integra

An Ultra High Precision cutter bar with the added convenience of an integrated base and lifting handles

- Slimline base fits any bench
- Vertical cutting action & interchangeable tools
- 4 sizes: 1.6m, 2.1m, 2.6m & 3.1m

Our cutting bench is an ideal partner for the Javelin Integra

Cutting Bench

For use with the Javelin Integra or as a stand-alone bench

- High grade, precision alloy construction for supreme strength & lasting resistance to abrasions & damage
- Unique joint lock gives double safety under heavy load and an ultra rigid structure
- Height adjustable feet on all benches

I need a cutter and a bench to mount it on for a full cutting solution

Javelin S2

Can be used as a portable cutting solution but best suited to mounting on the optional BigBench

- Portable or bench mounted
- Vertical cutting action & interchangeable tools
- 5 sizes: 1.1m, 1.6m, 2.1m, 2.6m & 3.1m

BigBench: Designed for the Javelin

BigBench

Purpose built bench for the Javelin Series 2

- Integral Lift & Hold Mechanisms
- Full-length adjustable baseplate with cutting groove
- High grade, precision alloy construction for supreme strength & lasting resistance to abrasions & damage
- Unique joint lock gives double safety under heavy load and an ultra rigid structure

High Precision cutting is fine for my application

I would like a cutter bar without a base that can be used for general purpose work and taking to site

Simplex

Lightweight, general purpose alternative to the Javelin S2

- Lightweight and portable
- Ergonomic rocker-style cutting head
- 5 sizes: 1.1m, 1.6m, 2.1m, 2.6m & 3.1m

I need the portability of a cutter mounted on a baseboard that I can take to the work station when required

Sabre S2

Ideal for one-off or volume production. Precision slide-way constructed on a robust anodised aluminium baseboard

- Use on a bench or attached to the optional stand
- Integral baseplate with hinge arms
- Vertical cutting action & interchangeable tools
- 5 sizes: 1.0m, 1.5m, 2.0m, 2.5m & 3.0m

I require a cutter that will cleanly and precisely cut paper, thin film and/or other delicate materials that cut better with a scissor action

Technic ARC/TE

Innovative twin-wheel cutter. Available with or without a baseboard

- Two-way cutting using heavy duty twin tungsten steel cutting wheels
- Patented sub-surface monorail bearing system
- ARC TE permanently mounts to existing table
- Movable stands – optional for Technic ARC only
- 5 sizes in each model from 1m-3m
